

Disadvantage traditional windturbine

- X** Lot of sound
- X** Uses only Linear wind
- X** Uses power to turn to the Wind
- X** Electric start
- X** Begins at 4 m/s
- X** Is inhibited at 15 m/s
- X** Technical life 15 years
- X** Wind outflow conical
- X** Far apart from each other
- X** Single bearing
- X** Non suction result
- X** Must be placed at higher level
- X** Multiple rotating parts

Advantage Blue Mill™

- ✓** No sound
- ✓** Uses linear and turbulent Wind
- ✓** Turns independently to the Wind
- ✓** Starts independently
- ✓** Begins at 2,9 m/s
- ✓** Is inhibited at 19 m/s
- ✓** Technical life more than 20 years
- ✓** Wind outflow bundled
- ✓** Close to each other
- ✓** Bearing on two supports
- ✓** Suction gives more result
- ✓** Can be placed at lower level
- ✓** Just one rotor rotating
